

Summary Information on Valid Licenses of JSC "ROMONA"

(Current information on documents is available in open electronic registries of the relevant state licensing authorities)

No.	Type of Licensed Activity	License No.	Date of License Issuance	Name of Licensing Authority
1.	Geodetic and cartographic works: - Creation of state gravimetric networks; - Creation of special-purpose geodetic networks, including networks of differential geodetic stations; - Establishment, modification, and refinement of the state border of the Russian Federation; - Creation and/or updating of state topographic maps or state topographic plans; - Creation of state leveling networks; - Creation of state geodetic networks; - Determination of Earth's figure parameters and gravitational field; - Establishment and modification of boundaries between constituent entities of the Russian Federation, boundaries of municipalities, boundaries of populated areas, boundaries of zones with special conditions of territory use	Л1036-00116-65/00004590	22.04.2013	Office of the Federal Service for State Registration, Cadaster and Cartography for Sakhalin Oblast
2.	Activities in hydrometeorology and related areas (excluding activities carried out during engineering surveys for the preparation of design documentation, construction, reconstruction of capital construction projects): - Conducting observations of the environment, physical and chemical processes occurring in the environment, to determine its meteorological characteristics (excluding characteristics obtained for the purpose of air navigation support of aircraft flights); collection, processing, storage, provision, and dissemination of information and information products obtained as a result of such observations	Л1039-00117-77/00679468	18.09.2023	Federal Service for Hydrometeorology and Environmental Monitoring of the Ministry of Natural Resources and Ecology of the Russian Federation
3.	Performance of mining surveying works: - Maintenance of mining graphical documentation; - Monitoring of mining allotments and substantiation of their boundaries;	Л1037-00109-65/00504527	05.07.2012	Federal Service for Environmental, Technological, and Nuclear Supervision

	<ul style="list-style-type: none"> - Identification of hazardous zones of mining operations, as well as measures to protect mining operations, buildings, structures, and natural objects from the impact of subsoil use-related activities; - Design of mine surveying works; - Spatial-geometric measurements of mining operations and underground structures, determination of their parameters, location, and compliance with design documentation; - Recording and substantiation of mining volumes 			
4.	Additional professional education	Л035-01259-65/00196809	01.08.2019	Ministry of Education of Sakhalin Oblast
